

## **List of IMPRINT projects supported by DSIR during 2016-17**

- Design & Fabrication of an aerodynamic lens for nanoparticles of variable size – IIT Hyderabad
- Development of an innovative process to fabricate ultrafine grained by metallic thin sheets for microforming applications – IIT Madras
- Continuous discharge measurement in small open channels by using ultrasonic tomography – IIT Kanpur
- Low cost additive manufacturing technique for fabricating through-substrate Vias based Three dimensional structures used in MEMS applications – IIT Bombay
- Fabrication and evaluation of atomic force microscope brobes with detachable and re-useable tips – IISc Bangalore.
